Variable sitting

What is that???

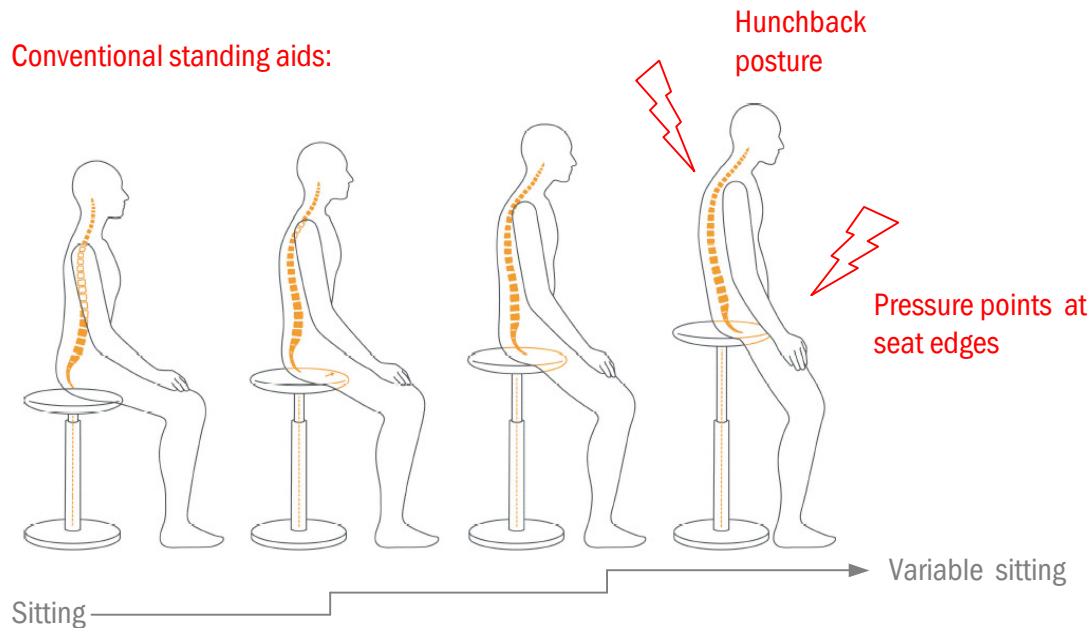

Actually, quite logical: hours of rigid sitting make you ill. At least it makes practically everybody's back ache. Standing all the time is not really an alternative either. It is much better to put movement and change into sitting.

The „muvman“ tilts forward so that you always sit at an optimum distance to your working surface – regardless of your height and physique.

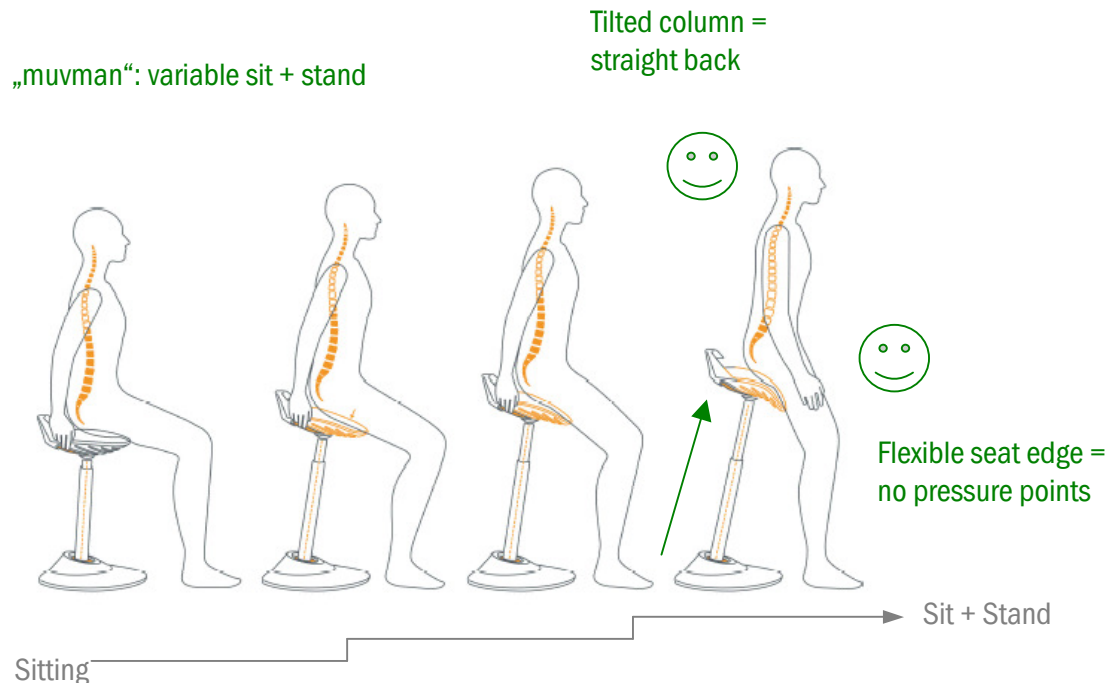

Sitting in motion and always keeping your balance on an intelligent seat that makes sure that you are always sitting comfortably on a stable foot in a maximised height adjustment range of 33 cm. Uncompromisingly good!

In this way, you **sit** and **stand** correctly! With the „muvman“ variable seat.

Conventional standing aids/variable seats are often rigid and have a hard seat causing pressure points at the edges. These prevent the return of venous blood; you sit rigidly without any movement and the higher the sitting position, the more likely you are to adopt a hunchback posture.

The „muvman“ has an intelligent seat with flexzone technology. It supports you when you need it and gives instead of pressing. Moreover, the „muvman“ NEW has improved elasticity at the seat corners. You sit in motion and are always well balanced. The preset tilt of 4° automatically adapts to your sitting position. Whatever sitting height you choose, the tilt automatically ensures that you keep an upright position.

Technical data

- Seat surface: 34 x 32 cm
- Seat height: 51 – 84 cm
HIGH version: 60 – 93 cm
- Comfortable sitting thanks the larger, polyurethane soft foam cushion in the region of the ischial tuberosities.
- Adaptable flexzone at the front edges of the seat and improved corner elasticity (seat with integral cushion of polyurethane soft foam).
- Seat cover: micro fibre (breathable, easy to clean)
- Prominent grip, wipeable, easier to grasp thanks to large radius
- 2 seat colours: black, grey (slightly darker, more hard-wearing)
- 2 base colours: black, grey (slightly darker, more hard-wearing)
- Easy-touch buttons under the seat in the middle (easier to reach and operate)
- 1 baseplate for all types of floor: all-round non-slip, non scratch rubber
- „muvzone“ colour matched
- Tilt adjustment: fixed 4° tilt
- Weight without packaging: 6,3 kg
- Base material: glass-fibre reinforced polyamide
- Optional HIGH version available

Great.
(Others think so, too).
