## Basic catalogue

To design inspiring spaces for learning – that has always been the vital challenge that VS Vereinigte Spezialmöbel-fabriken GmbH & Co. KG has set itself. As one of Europe's leading manufacturers of school furniture and a full-range supplier with a wide portfolio, this is exactly what we offer our customers: comprehensive, stimulating furnishing, spatial and media solutions for educational establishments. In addition, we offer an extensive range of services such as planning, project support and customer service.

Our products stand out for their quality, functionality and durability. As has been proved by comparisons worldwide. The issue of sustainability is extremely important for us. And so too, of course, is safety. And you will find information about both these topics in this catalogue.

We hope you enjoy browsing through it, discovering new ideas and planning your space! If you need answers to any questions, advice or project support, our qualified customer support staff will be delighted to assist you personally.

## Furniture supplier and fitter for the knowledge society since 1898

VS Vereinigte Spezialmöbelfabriken GmbH & Co. KG is one of the most expert and dynamic full-range suppliers of school equipment in Europe – with a wide range permitting comprehensive equipment concepts for schools, public authorities, offices and conference spaces.

This family-owned company has been developing, manufacturing and marketing furniture and media equipment for the knowledge society for over 120 years. Its head office and sole production site is located in Tauberbischofsheim in Baden-Württemberg, Germany.

It is from here that VS controls the entire logistics chain. This includes consulting and planning by its own specialists as well as delivery, assembly and project support from customer support and service staff. In this way, it is able to develop high-performance, economically attractive end-to-end solutions for its customers.

Whereas in the past, the task was to translate reforming educational ideas into room concepts, the focus nowadays is on modern pedagogic and educational requirements: To design schools as a learning and living space for students and teachers; to provide space for variable learning settings; to create possibilities for differentiated and individual, collaborative and personal, teacher-centered and self-driven learning.

Solutions for digital learning landscapes also play an important role. "VS – Das Systemhaus" is the VS Vereinigte Spezialmöbelfabriken centre of expertise for technical all-round solutions covering every aspect of digital media. As a specialist in the integration of digital media in school and teaching environments, "VS – Das Systemhaus" can supply everything required: interactive displays and boards, peripheral equipment, support systems, safe and secure connection solutions and simple device management. The technical solutions are integrated in the corresponding room and furnishing concepts.

## Reliable, sustainable, responsible

As a large, family-owned SME, VS stands for a reliable, responsible and independent business approach. The company has adopted a long-term strategy geared towards sustainability. This has given it its successful competitive position.

### Continuity at the company site

VS develops and manufactures its products directly at its headquarters in Tauberbischofsheim and continuously invests in modern production facilities and highly efficient processes. This results in the creation of economically attractive furniture with convincing functionality.

### Data and facts

- VS was founded in 1898 as Vereinigte Schulbankfabriken. One of the milestones in the company's history was the development of the wooden skid chair in 1950.
- VS is a family-owned company with 1,500 employees. The Managing Director is Philipp Müller.
- VS has always supported contemporary pedagogic initiatives. VS is developing comprehensive room concepts for educational establishments in the company of the Federal association for posture and movement promotion (Bundesarbeitsgemeinschaft für Haltungs- und Bewegungsförderung e.V.) and the consulting firm LernLandSchaft.

### Quality and environmental standards

- Quality management system as per DIN EN ISO 9001.
- Environmental management system as per DIN EN ISO 14001.
- Energy management system as per DIN EN ISO 50001.
- Various quality and environmental certificates awarded to VS products by external test institutes, for example Cradle to Cradle Certified, European Level, GS label for tested safety, the label "TÜV Rheinland certified: Emission-tested. Pollutant-tested", AGR Healthy Back Campaign quality label (Aktion gesunder Rücken e.V.), Greenguard certificate.

### Training and vocational education

- Training through seven occupational courses and six work/study courses in the industrial, technical and commercial sectors.
- An in-house technical training center.
- Cooperations with schools and universities.
- Awarded the Dualis label by IHK Heilbronn-Franken as a company with superb training opportunities.
- Gold partner of the Baden-Wuerttemberg Cooperative State University, Mosbach.

## EPI: our new Environmental Product Information

How sustainable are our products? What environmental impact do they have in their various life cycle stages, in terms of materials, transport, manufacturing and recycling? Our new environmental product information, the UPI, provides information about this. Among other things, it explains how high the proportion of recycled material is in our products and how low the CO<sub>2</sub> emissions are in their production. In addition, it shows further environmental impacts in a detailed life cycle assessment. In addition to product-specific environmental statements and data, the UPI also contains general statements from VS on the subject of sustainability.

The data basis comes from the so-called GaBi database. Its data sets provide the basis for a standardised life cycle assessment calculation. In addition, the GaBi database is constantly updated and adapted to the latest technologies and economic changes. This means that the LCA results of the new UPI from VS are one-to-one comparable with the EPDs, the Environmental Product Declarations, or other sustainability data sheets.

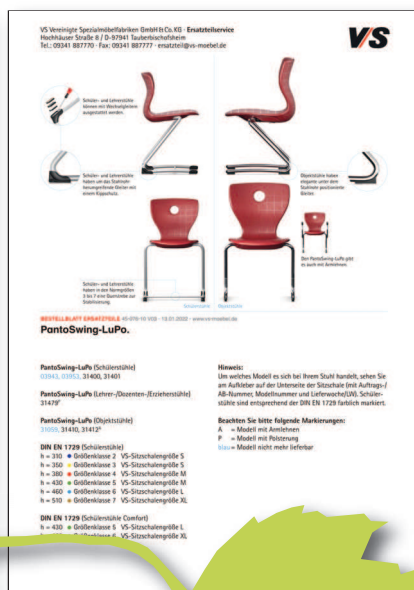

In addition, a UPI contains statements about the CO<sub>2</sub> footprint and the cradle-to-gate balance. This is the life cycle assessment of the life cycle stages from the purchase of materials to the delivery of materials to the production of the furniture.

This is how our EPI is structured:

- The first page contains a general product description as well as information on the materials used and recycled content. The product life cycle and the carbon footprint are also presented here.
- The life cycle assessment table on the second page includes the global warming potential as well as other environmental impacts – such as soil acidification or ozone layer depletion potential – and a cradle-to-gate balance, i.e. the summary of life cycle stages A1-A3. This also includes information on transport and impacts during use, as well as information on the disposal and recycling phase.
- On the last page of the UPI, we show how we are committed to sustainability.

All in all, the EPI gives us and our customers a comprehensive view of the environmental product characteristics.

Spare parts

## The VS spare parts service: Sustainability in practice

Our products are designed for maximum durability and many years of use. Even long after you have invested in our furniture, you will still receive spare parts – whether chair glides, locks or keys and much more. This saves all our resources and your wallet.

Reordering is very easy. On our website you will find spare parts lists for the most common school products as PDF files for downloading:

- Order form master keys and spare parts
- Spare parts lists blackboards and interactive media
- Spare parts lists for lockers
- Spare parts lists chairs
- Spare parts lists tables
- Organisation accessories for containers

With the help of diagrams and detailed illustrations, the required parts can be easily identified here and ordered immediately. If the part you need is not included or you are not sure what you need, simply call our spare parts team. Or send a photo by e-mail:

In addition, the spare parts service offers you tips and advice on the proper care, cleaning and disinfection of our products – from furniture surfaces to seat shells, fabric and imitation leather to displays. These PDFs are also available for download on the Spare Parts Service page.

## SPACE: Storage space to go

Modern teaching thrives on changing work scenarios in different rooms throughout the day. Ideally, the work materials should also be available in a flexible manner – sometimes in one room, sometimes in another. To leave, to exchange, to take back. This is possible with Space, our storage space to go.

SPACE is available in two versions: as a stationary wall-mounted module SpaceStation-G and as a mobile module with castors SpaceWalk-G. The system is based on the Gratnell® system. In the stationary module, the boxes are stored in a central location, prepared with teaching materials: for example, with everything needed for a specific task. Or with utensils for handicrafts and crafts. Or the equipment for experiments. The different colours of the boxes and the labelling on the front provide an overview.

### The principle

From SpaceStation-G, the required boxes are repacked into the mobile module SpaceWalk-G and rolled to the classroom. Here, the pupils take the boxes and bring them to their workplaces.

This is where it pays off that SPACE is coordinated with our other furniture systems: the Gratnell boxes can be pushed under the corresponding pupil desks. They can be stored in the Shift+ Landscape and Serie 800 storage units. And they fit under the Shift+ Up pedestal.

When the students have finished their task, they put the boxes back into SpaceWalk-G. This makes keeping order easy. Afterwards, SpaceWalk-G remains in the classroom until the next assignment or is pushed into the next room. The teacher can also take the module together with the boxes into the teachers' room to correct the work results.

Whether in frontal teaching or for individual and group work, whether in the classroom, in the compartment or in science rooms: work utensils can be easily transferred from one piece of furniture to the next in the Gratnellboxes. Even entire class sets can be moved from the central storage areas to the respective place of use with the help of the mobile units.

#### Construction and equipment

Since SPACE is subject to a lot of stress, the modules have to be robust and – in the case of SpaceWalk-G – still easy to move. High load-bearing capacity, simple operation and an appealing design were therefore decisive for us in the design.

The frame of the SPACE modules is made of powder-coated rectangular steel tubing at our factory in Tauberbischofsheim. Top shelves, side panels and doors are made of powder-coated sheet steel. The door is only available with a lock and can be opened 180°. The guide rails for the Gratnell boxes have pull-out stops.

SpaceWalk-G is equipped with four lockable double swivel castors. There are models that can be used on one, both sides or alternately. SpaceStation-G has plastic glides; this module is always attached to the wall. If several SpaceStation-G are placed next to each other, they should be linked with row connectors.

SpaceStation-G can hold 18 flat or 8 high boxes per row, with or without lids. SpaceWalk-G can hold a maximum of 9 flat or 4 tall boxes per row, also with or without lids. Each box can be loaded with a maximum of 5 kilograms.

SPACE is available in various designs: with or without side panels, with or without doors, plain or in different colours for each component.

## Tano: one table, many placement options

The unusual shape of the tabletop is the hallmark of our new Tano student's table: an asymmetrical student's table where one corner has a slightly blunter design. Thanks to this shape, Tano is particularly versatile and very easy to combine: In no time at all, the fully-fledged individual workstation becomes a table for partner or small group work or for the large group.

Tano is available in the fixed size categories from 2 to 7, as well as in size 0 and 30 centimetres for learning close to the floor and table height 74 centimetres for office use or five-fold height-adjustable. All models are available in two

widths. The stackable table is thus suitable for flexible learning and working from primary school to grade 13 and in the staff room.

A Gratnell box can be inserted under the tabletop. A folder hook can be attached to the side of the table.

To make Tano easier to move, it is also available with two lockable castors. It is available in various materials and colours. All in all, a flexible multifunctional table for any size of room.

## New learning space concepts, many ways to learn

The school day is becoming ever more dynamic and varied. It is moving away from continuous teacher-centred teaching, the time spent at school is increasing and full-day schools offering optional extra-curricular activities are becoming ever more popular. All this demands new types of space concepts.

Mobile furniture such as the Shift+ range and the elements in the FloorFriends concept support this need for versatile learning and working landscapes. Further modules are now being added: the ShiftUp stage element and the Leaf tent element. These provide an uncomplicated way of designing varied teaching scenarios that respond particularly well to children's needs.

Both of these elements can be erected and dismantled quickly and easily and can be stored away to save space after use. As a result, the space can be designed to meet the current needs at any time. These elements are intuitive to use. Even children under the age of 12 years are able to use them to create learning spaces on their own initiative.

ShiftUp is a simple stage unit that can be combined in many different configurations and can also be used as a low table or table-bench combination. The dimensions have been designed for use with the FloorFriends floor mats and the Shift+ Landscape shelf and cabinet elements. The basic shapes available are triangular and rectangular. The top can be turned over without the need for any tools so that either the walking or writing surface is facing upwards. In the school environment, ShiftUp is suitable for use in classrooms just as much as it is in shared spaces such as the canteen, main hall or library.

The Leaf tent element opens up a completely new dimension for learning spaces. Children love nooks and crannies and sheltered places to retreat into. With Leaf, such spaces can be created in moments. In this way, it is possible to create tunnels, group tents or individual refuges where children will find exactly the learning conditions that they need for concentrated individual work or quiet discussions. One space becomes many spaces, groups can be split up and variety and individuality are encouraged.

## Stakki, a new, iconic chair

Three legs, triangular basic shape, minimized design, manufactured from a single part. The Stakki chair stands out at first sight. It is visually and functionally unique – an iconic chair. It is also sustainable thanks to the low raw-material input and the recyclable material used.

Stakki is manufactured as a monoblock unit using multi-component injection moulding coupled with an internal gas pressure process. This gives it volume and stability at a weight of only 3.8 kilograms.

Users can sit on Stakki equally well and ergonomically in any way they want: front-on, side-on or astride. The triangular basic shape also helps save space. The chairs can be accommodated like the pieces of a cake under a round table. The dual-component glide elements ensure stability and are also very gentle on the floor. Their stepped shape and the concave leg profile permit intuitive stacking of the chairs. Ten units can be stacked almost vertically on top of one another.

Stakki has been comprehensively tested and is certified as being safe. The tests conducted by the TÜV certification authority certify that it is suitable and approved for indoor and outdoor use.

Stakki was designed by Martin Ballendat. The designer and his studio have already worked for numerous international companies and brands. He designs furniture for residential, office and other non-residential uses. He has always been fascinated by the question of chairs.

In the case of Stakki, he has provided an extreme example of the designer's art. He wanted to reduce the chair to the absolute minimum: As little as conceivably possible to provide the greatest possible functionality. And he has succeeded. Thanks to the "high design quality", Stakki received a Red Dot in the categories Innovative Product and Furniture Design at the Red Dot Award 2020.

## Hokki, Hokki+ Height-adjustable active stool

Hokki is the solution for dynamic sitting. Thanks to its rounded base, it can move in all directions and consequently permits permanent changes of posture without difficulty. Not only is this fun, it also aids motor capabilities.

The Hokki is now also available as the height-adjustable Hokki+ variant. The two models have a height adjustment range of 38 to 50 or 50 to 68 centimetres. This makes it possible to cover all school requirements.

Just like the fixed-height Hokkis, both models of the Hokki+ possess the quality label awarded by the Healthy Back Campaign (Aktion Gesunder Rücken e.V.) and have been tested and recommended by the Bundesverband deutscher Rückenschulen e.V. (German federal back training association) and the forum Gesunder Rücken – besser leben e.V. (Healthy back for a better life).

The Hokki+ is extremely stable but also so light that even children and young people are able to carry it. The adjustment mechanism with its gas spring is immediately accessible and can be activated from anywhere under the seating surface.

The basic body of the Hokki and Hokki+ is made from recyclable polypropylene. This makes this active stool extremely scratch-resistant. Even the toughest everyday conditions pose practically no threat.

## Level-LuPo and Level-VF Healthy sitting for all ages

Ergonomics plays a major role at school. That is why DIN EN 1729 defines the dimensions required of school furniture so that children and young people of all sizes can work at it productively and healthily.

Conventionally equipped classes contain chairs and tables of different sizes in one and the same room. The size of the chair is determined by the distance between the floor and the seating surface and the size of the seat shell. The table height is harmonized with this.

In **multi-year learning environments**, there is only one common table height. It is the chairs that ensure ergonomic seating. In this case, the chair size is defined by the distance from the foot support to the seating surface, the distance from the seating surface to the table top and the size of the seat shell.

The frames of the Level-LuPo and Level-VF chairs have drill holes at four different fixed heights. These make it possible to adjust the height of the foot support in accordance with the specified standard sizes as well as for further seating heights.

Two Level models have been developed for the **table height of 71 centimetres**: with seat shell S for the standard chair sizes 2 and 3, and with seat shell M for standard size 4.

For the **table height of 76 centimetres**, there are three models: with seat shell S for the standard sizes 2 and 3, with seat shell M for the standard sizes 4 and 5, and with seat shell L – in this case without foot support – for standard size 6.

In multi-year learning environments, Grattells boxes, lattice-type book storage or chair suspensions restrict the freedom of the legs and should therefore not be used.

Detailed information on the Level and the other chairs in the series can be found in the "Level" catalogue.

## FloorFriends

**PRODUCT INFORMATION** Welcome\_TY\_EN - 29.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Welcome Cloakroom system for kindergartens and primary schools with the “slippers in class” principle

System consisting of an optionally combinable wall panel with clothes hooks, a shoe cabinet and a wall cabinet. Wall panel made from 19-mm-thick melamine resin-coated chipboard with four black double hooks offset from one another. The hooks, which have been certified by the TÜV product testing authority are rounded and equipped with a curved top part to prevent injury. The gap to the wall required for installation is covered with a sealing lip. The wall panels are available in two heights, making them suitable for kindergartens and primary schools and each panel can be used by a maximum of eight children.

Shoe cabinet consisting of a body made from melamine resin-coated chipboard with a central partition and two fixed, glued panels. The four shoe compartments for eight pairs of shoes can optionally be equipped with a black plastic base for putting shoes on. A tough HPL cover panel can be mounted on the top panel. The shoe cabinet, which possesses a set-back 8-mm base, is positioned in front of the wall panel and is screwed to it.

Wall cabinet consisting of a body which is subdivided into four compartments and made from melamine resin-coated chipboard. The wall cabinet is fixed directly to the wall above the wall panel.

The following material groups are available to choose from: Body made of chipboard: L6; Wall panel: L3.

**PRODUCT INFORMATION** Shift-p-Up\_TY\_EN - 22.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Shift+ Up Table-bench platform for presentations and floor-level learning.

Multipurpose unit which can be used as a platform, table or bench. Stage-like landscapes of a maximum of two levels can be created from the rectangular and triangular elements. Centre distances matching the storage room units and mats of the Shift+ series.

Frame made from circular steel tubing with all-round rectangular tube edge. The legs are equipped with conical stacking and glide elements and can be securely stacked on top of one another up to a height of two using a spring buffer. Elements located next to one another (max 20 sqm) must be linked together using a flexible rotary connector. Optionally with guide for plastic Grathells boxes.

Tops made from plywood. One side with anti-slip screen-printed structure for standing on and the other with a smooth surface for use as a table or for writing. The top can also be turned without the need for any tools. The sides can be closed off with an insertable panel for use as a stage.

Transport cart for the tops and the elements inserted in one another.

The following material groups are available to choose from: Frame made of steel tube: M1; (plain black); Grathells plastic box: C3.

**PRODUCT INFORMATION** Leaf\_TY\_EN - 22.02.2022 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Leaf Tent element for floor-level learning.

Tent elements for creating individual withdrawal areas in the classroom for individual children or small groups. The triangular material elements can be combined with the mats from the Shift+ series to create tent configurations and nooks and crannies. Similarly, the textile sail-type elements can be fixed to any magnetic surface (cabinets from the Shift+ series) using magnetic fastenings. A tent pole, which can also be used in combination with the Gugl storage element and/or the triangular Shift+-Landscape mats, makes it possible to construct a round tent consisting of a maximum of 6 sail elements. Textile sail element, consisting of a stretch fabric and glass fibre rods for tensioning the triangular surface. With 3 fixing points on the long and one fixing point on the short side.

Tent pole, consisting of a solid wood pole with stand plate made of HPL solid board and with a 6-way adapter in two heights, positionable using a bayonet fixing.

Shift+-Landscape mats, optionally with 1 to 3 fixing points (see above).

Magnetic fixings to fasten the sail elements to any magnetic surface.

Storage bag for transporting and storing the sail elements and curved glass-fibre rods.

Fire protection of upholstered mats optional according to DIN 66084 corresponding to classes P-c (low), P-b (medium), P-a (high).

The following material groups are available to choose from: Fabric sails: S77; Fabric cover: 40,64,81.

## Gugl

### Occasional-element with integrated storage space. FloorFriends for floor-level learning.

Body made from deep-drawn, conical ABS plastic. The body is stackable.

Top made from HPL top. The top can be removed to access the storage space and is equipped with a groove to protect it against slipping. The storage space can accommodate back casters (09379), carpets (09440) or upholstery mats (09445). Padded mats consisting of a thick, foam-padded body with anti-slip bottom, side carrying loop and a black, all-round surrounding strap. The top seating surface consists of a hard-wearing, coloured covering.

Fire protection of upholstered mats optional according to DIN 66084 corresponding to classes P-c (low), P-b (medium), P-a (high).

Equipment: Optionally available with a black polypropylene pen insert in the top.

The following material groups are available to choose from: Body made of plastic: C(white, black grey RAL 7021); HPL-top: L4; Fabric cover: S40,64,81.

## Shift+ Landscape Soft seating elements.

Upholstered-element system consisting of carcass and seating elements.

Seating elements are linear or curved stools. Individual elements can be combined to form complete landscapes. Elements consisting of a floor plate with plastic or felt glide elements and a cushion of foam with leatherette cover.

Seating sizes in 3 fixed heights in accordance with DIN EN 1729.

Carcass of melamine-resin-coated chipboards with glued-on plastic edge. With glued centre wall for partitioning the carcass. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel.

Function: Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back to back to create circular and serpentine seating/cabinet landscapes.

Fire protection of the upholstery elements optionally according to DIN 66084 corresponding to classes P-c (low), P-b (medium), P-a (high).

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1; Fabric cover: S40,64,81.

## Shift+ Landscape

### Padded mats, carpets and back support rolls.

### FloorFriends for floor-level learning.

Padded mats consisting of a thick, foam-padded body with anti-slip bottom, side carrying loop and a black, all-round surrounding strap. Available in rectangular form or as a 60° wedge-shaped element to match the Shift+ cabinets. Can be used as a floor covering for one person or as a chair covering. The top seating surface consists of a hard-wearing, coloured covering.

Carpet consisting of a top surface made from black, hard-wearing artificial fibres and a rubberized, slip-proof bottom side. With side carrying loop. Available in rectangular form or as a 60° wedge-shaped element to match the Shift+ cabinets.

Back support roll consisting of a foam-padded body with black side element and hard-wearing, coloured covering.

Fire protection of upholstered mats optional according to DIN 66084 corresponding to classes P-c (low), P-b (medium), P-a (high).

**PRODUCT INFORMATION** EcoTable-R-Floor\_TY\_EN - 09.12.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## EcoTable-R FloorFriends tables for floor-level learning.

Frame consisting of an all-round rectangular steel edging with welded-on table legs made from circular tubular steel, powder-coated with coloured epoxy resin. Table with levelling screw-type feet, glide elements for hard or soft floorings or universal glide elements.

Tables in extra-low heights of 30 or 40 cm for floor-level learning.

Table top made from 19-mm or 25-mm melamine resin-coated or laminate-coated chipboard with glued plastic edge or highly rigid moulded PUR edge. Some also with rigid 13-mm HPL top. All models available with angled or curved (radius = 25 mm) corners.

Optionally available with plastic Grattells box integrated in the edge frame.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; HPL-top: L4; Chipboard with laminate: L9.

## Hokki, Hokki+ Stool, height-adjustable stool.

Stool made from stable, durable and extremely scratch-resistant polypropylene, fully recyclable. Comes with a lightweight foam seat shell (grey) or optionally with an extra-soft padded artificial leather cover (black). Thermoplastic base screwed to the polypropylene body.

Chair sizes in 4 fixed heights as set out in DIN EN 1729, one additional extra-large size and two sizes with gas-spring height adjustment.

**Function:** Offers freedom of movement in controlled conditions thanks to curved surfaces that stimulate the entire musculo-skeletal system. Easy to carry thanks to ergonomically shaped, undulating seating edge that is easy to grip and also prevents the user from slipping off. The stools are easy to transport and can be moved together to save space. Height-adjustable models with all-round activation mechanism and ergonomic depth suspension.

The following material groups are available to choose from: Body made of plastic: C2.

		Seating heights ( $\pm 1$ cm) as per DIN EN 1729 ● 2 = 31 cm ● 4 = 38 cm ● 5 = 43 cm ● 6 = 46 cm ● 7 = 51 cm

## Students' chairs (multi-year classroom groups)

**PRODUCT INFORMATION** Jumper-Air-S-Level\_TY\_EN - 09.12.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## JUMPER Air Level

### Skid chair for ergonomic seating solutions in multi-year classroom groups.

Frame made from curved, powder-coated or chromium-plated circular steel tube with height-adjustable foot support (optional in 33409) that can be adapted step-by-step to the required size without any tools. Two robust cross-pieces between the skids ensure the smooth, precise guidance of the foot supports.

Student's chairs for raised seating at 71 or 76 cm-high tables. In fixed heights each with 4 foot support settings, maximum 2 of which as per DIN EN 1729.

Seat shell made from double-walled, structured polypropylene (Air) for comfortable seating with air cushion effect. With covered seat fixing and grip hole.

Equipment and options. Glide elements for hard or soft floors or dual-component multipurpose glide elements or, optionally, interchangeable glides with replaceable glide elements. For maximum number stackable with foot supports in upper "park position" (ST), see table.

Recommendation. JUMPER Air Level can be combined with school tables (without bookshelf and chair suspension) of height 71 or 76 cm.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Seat and backrest: C4.

## JUMPER Air Move HS

### Star-foot chair with foot ring for ergonomic seating in multi-year classroom groups.

Frame consisting of an aluminium star-foot and plastic-covered gas spring mechanism and height adjustment. Student's chairs for raised seating at 71 cm-high table tables.

Seat shell made from double-walled, structured polypropylene (Air) for comfortable seating with air cushion effect. With concealed seat fixing and grip hole.

Equipment and options. Glide elements or castors for hard and soft floors or 2C universal glide elements. With foot ring and particularly easy-to-use 3D rocker mechanism. Model with reduced-weight gas spring mechanism suitable for children. With piggy-back hook for suspension of chair on table tops.

The following material groups are available to choose from: Foot of aluminum: M1; Seat and backrest: C4.

		Seating heights ( $\pm 1$ cm) as per DIN EN 1729 ● 3 = 35 cm ● 4 = 38 cm ● 5 = 43 cm  When fitted with castors, the height increases by 23,5 mm.

## JUMPER Ply Level

### Skid chair - ergonomic seating solution for multi-year classroom groups.

Frame made from curved, powder-coated or chromium-plated circular steel tube with height-adjustable foot support (optional in 33409) that can be adapted step-by-step to the required size without any tools. Two robust cross-pieces between the skids ensure the smooth, precise guidance of the foot supports.

Student's chairs for raised seating at 71 or 76 cm-high tables. In fixed heights each with 4 foot support settings, maximum 2 of which as per DIN EN 1729.

Seat shell made from beech plywood (Ply) with anti-slip paint, concealed seat fixing and grip hole.

Equipment and options. Glide elements for hard or soft floors or dual-component multipurpose glide elements or, optionally, interchangeable glides with replaceable glide elements. For maximum number stackable with foot supports in upper "park position" (ST), see table.

Recommendation. JUMPER Ply Level can be combined with school tables (without bookshelf and chair suspension) of height 71 or 76 cm.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Seat and backrest: H3.

	Seating heights (± 1 cm) as per DIN EN 1729 ● 2 = 31 cm ● 3 = 35 cm ● 4 = 38 cm ● 5 = 43 cm ● 6 = 46 cm

## Tano Asymmetrical stacking table.

Frame consisting of an rectangular tubular steel frame with welded tubular steel table legs, colour epoxy powder-coated. Table with floor levelling screws, glides for hard or soft floors or with universal glides or with 2 or 4 lockable castors. The table can be stacked 6 high.

Tabletop shape ideal for a variety of combinations and set-ups for individual, double and group work.

Tables in 7 fixed heights according to DIN EN 1729, a further height of 30 cm for learning close to the floor and in 74 cm office height.

Tabletop made of melamine resin or laminate coated 19 mm or 25 mm chipboard with glued-on plastic edge. Partly also with a firm 13 mm HPL solid core board. In each case with angular or rounded corners.

Optionally with a Gratnells plastic box integrated in the frame and lateral folder hook. The table can be equipped with a ReCharge module for wireless charging of iPads with VS charging sleeve.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4.

	Table heights (± 2 cm) as per DIN EN 1729 ○ 0 = 40 cm ● 2 = 53 cm ● 3 = 59 cm ● 4 = 64 cm ● 5 = 71 cm ● 6 = 76 cm ● 7 = 82 cm	Configuration <b>A</b> <b>B</b> <b>C</b>

## Shift+ Base Stackable four-legged tables.

Frame consisting of welded round tubular steel legs, some of which are offset outwards, with a central edging made from rectangular steel tubing, all powder-coated. Some models have tube-in-tube Allen-key height adjustment (see table). Desks with four plastic, felt or 2C universal glide elements or with glide elements and two lockable castors.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729.

Table top made from melamine resin or laminate-coated chipboard with glued plastic edge or high-strength solid HPL top. The corners have 25 mm rounding.

**Function:** It is possible to combine the two mirrored concave-convex basic shapes in many ways to create circles, rows and groups. In the park position, the tables are stackable up to a height of six tables and are equipped with stack protection at the lower edge of the top frame.

**Warning:** A maximum of three stacked (unloaded) tables may be moved together on castors.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.

## Shift+ Base Folding table.

Designed (FlipTable) with a centrally positioned tubular steel cross-piece with an articulated bracket. The table can be folded using a two-handed safety mechanism under the table top. It has a fitting to secure the table in both the horizontal and vertical positions.

Frame consisting of two curved, powder-coated steel tubes and four lockable castors.

Table heights in accordance with DIN EN 1729.

Function. When the top is tilted upwards, any number of tables can be pushed together to save space.

Table top in each case made from melamine resin or laminate-coated chipboard with glued plastic edge or high-strength solid HPL top. The corners have 25 mm rounding.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.

Further products on this page: JUMPER Air Move.

## Shift+ Base Semi-circular tables.

Frame made from welded round tubular steel legs with 5-cornered all-round rectangular tubular steel top frame, all powder-coated. Some models have tube-in-tube Allen-key height adjustment (see table). Tables with five plastic, felt or 2C universal glide elements or with five castors, two of which are lockable.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729.

Table top made from melamine resin or laminate-coated chipboard with glued plastic edge or high-strength solid HPL top. The corners have 25 mm rounding.

Equipment (01443): With a cable outlet (back) and a lockable, foldable metal cable tray.

Options (01443): With cable clamp, built-in socket, 5-way socket and convenient monitor arm.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.

## Shift+ Base

### Height adjustable sit-at/stand-at school table.

Frame made from welded, powder-coated, U-shaped steel skids and a centrally positioned upright. Skids with four castors as standard, two of which are lockable. Optionally with bookshelf and/or screen.

**Function:** The gas spring is triggered using a handswitch at the edge of the desk top. The handswitch is equipped with a safety cover to protect against unintentional activation.

Desk height continuously height-adjustable with built-in gas spring.

Desk top made from laminate- or melamine resin-coated chipboard with glued plastic edge or from high-strength solid HPL board.

**Equipment:** Optionally available with a bookshelf made from metal sheet bended on three sides below the table top and/or a chipboard or HPL screen.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.

## EcoTable-Q

### Student's table with square tubular legs.

Frame consisting of an all-round rectangular steel edging with welded-on table legs made from square tubular steel, powder-coated with coloured epoxy resin. Table with levelling screws, glide elements for hard or soft floorings or universal glide elements, or with 2 or 4 lockable castors.

Tables in 7 fixed heights in accordance with DIN EN 1729 as well as an additional height of 30 cm for floor-level learning. Table top made from 19-mm or 25-mm melamine resin-coated or laminate-coated chipboard with glued plastic edge or highly rigid moulded PUR edge. In some cases also with rigid 13-mm HPL top. Equipped with angled corners in all cases.

Optionally available with a built-in plastic Gratnells box, chair suspension rails or storage basket under the table top, satchel hooks on the side and under-table screen at side opposite from user.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; HPL-top: L4; Chipboard with laminate: L9.

Further products on this page: JUMPER Air Active.

## LiteTable-AL Stackable lightweight table.

**Frame.** The leg elements of round aluminium tube are pressed and screwed with high-strength special-alloy corner connectors to the square aluminium tube frame. The legs and frame are powder-coated. Thanks to the way in which the legs are spaced closer together and further apart in pairs, the table is stackable (ST) and can nevertheless, depending on how it is turned, be lined up against another table without gaps in between. Tables with glide elements for hard or soft floors or with 2C universal glide elements and optionally with 2 castors on legs spaced further apart.

Table sizes in 8 fixed heights in accordance with DIN EN 1729.

Table top with a chipboard top and a seamlessly cast (PUR) polyurethane safety edge or with a chipboard top and glued-on plastic plastic edge. Tops with plastic edge with edged or rounded corners.

**Function.** The table can be stacked thanks to the extremely lightweight, hard-wearing materials used.

**Warning:** A maximum of 4 stacked (unloaded) tables may be rolled on their castors.

The following material groups are available to choose from: Frame made of aluminum: M1; Top made of chipboard: L4; Top made of chipboard with PUR edge: L2.

Further products on this page: PantoSwing-VF.

## LiteTable-ST Stackable table.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable. What is more, they can be rotated to form continuous rows. Tables with glide elements for hard or soft floorings or with 2C universal glide elements and, optionally, with two castors at the outer legs.

Table sizes in 7 fixed heights in accordance with DIN EN 1729.

Table top with HPL or chipboard top and continuous, molded (PUR) polyurethane safety border or chipboard top and glued plastic border. Tops with KU border available with edged or rounded corners as required.

**Warning:** A maximum of four stacked (unloaded) tables may be moved together on castors.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; Top made of chipboard with PUR edge: L2; Chipboard with laminate: L9; HPL-top: L4.

## TriTable-III Triangular table.

Frame made from welded round tubular steel legs with rectangular tubular steel top frame, all powder-coated. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Tables in 7 fixed heights or with 5-position Allen-key height adjustment, all in accordance with DIN EN 1729, as well as an additional height of 30 cm for floor-level learning.

Table top (right-angle triangle with two equal sides) made from melamine resin or laminate-coated chipboard with glued plastic edge or with a high-density, solid HPL top, both with rounded corners (radius 25 mm).

**Function:** Many combinations possible to form rows or group workspaces. The tables are stackable up to a height of eight tables and are equipped with stack protection at the lower edge of the frame. Optionally available with removable plastic tray on the long table side.

**Equipment:** Optionally available with castor at the 90° corner or with three castors.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9; Grannells plastic box: C3.

## JUMPER StudioTable Stackable four-legged table for school use.

Frame consisting of welded legs with all-round edging made from powder-coated or chromium-plated precision rectangular steel tubing. Due to the asymmetrically positioned table top, the tables are stackable but can nevertheless be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Table sizes in 7 fixed heights as per DIN EN 1729 as well as an additional height of 30 cm.

Table top With a 19-mm melamine or laminate-coated chipboard top and glued plastic edge or a 13-mm HPL top.

**Function.** The rectangular table can be stacked by a single person due to the lightweight but tough materials. See table for maximum stacking capacity.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; HPL-top: L4; Chipboard with laminate: L9.

	Table heights ( $\pm 2$ cm) as per DIN EN 1729 ○ 0 = 40 cm ● 2 = 53 cm ● 3 = 59 cm ● 4 = 64 cm ● 5 = 71 cm ● 6 = 76 cm ● 7 = 82 cm

## Uno-C Skid desk.

Frame made C-shaped upright and flat-ended skids with plastic kick protection. Desk legs made from powder-coated or chrome-plated VS special steel tubing and cross-strut made from circular steel tubing.

Desk sizes: 6 fixed heights or with 6-stage grid height adjustment using an Allen key fixing. All products compliant with DIN EN 1729.

Desktop made from melamine-coated chipboard with continuous, moulded (PU) polyurethane safety edge or glued plastic edge, from exceptionally strong LIGNOdur safety board with soft, rounded edges, or from a high-strength HPL board (see table for dimensions and desktop types).

Equipment and options. With glide elements for hard and soft floors or 2K universal glide elements and satchel hooks. Also with screen, lattice-type book storage, plastic box or different kinds of chair suspension.

**Warning:** The desk height may vary depending on the type of desktop and the glide elements. Polyurethane edges are extremely tough. However, their colour may change over time.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of LIGNOdur: L1; Top made of chipboard with PUR edge: L2; Top made of chipboard: L4; HPL-top: L4.

Further products on this page: JUMPER Air Active.

## StepByStep-I Skid table, adjustable in height.

Frame of powder-coated steel tube with asymmetrically-positioned legs (cantilever) on steel skids with kicking protection. All steel tubes in round profile.

Table heights in 6 steps in accordance with DIN EN 1729. Height adjustment in steps with Allen-key or hand-wheel.

Table top made from melamine-resin-coated chipboard with a seamlessly cast-on safety edge made from (PUR) polyurethane. Optionally with an extremely robust LIGNOdur safety top with softly rounded edges.

Features of top. Fixed horizontal working surface.

Accessories and options. Also with lattice-type book storage, plastic box or different kinds of chair suspension.

Important notice. The table height can vary slightly depending on the type of top and the glides. PUR edges are extremely robust, but can show signs of discoloration over time.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of LIGNOdur: L1; Top made of chipboard with PUR edge: L2.

## Ergo-I Skid table, adjustable in height.

Frame of powder-coated steel tube with asymmetrically-positioned legs (cantilever) on steel skids with kicking protection. All steel tubes in round profile.

Table height in accordance with DIN EN 1729. Frame with continuous height adjustment with winding handle.

Frame features. Continuous height adjustment with winding handle.

Table top made from melamine-resin-coated chipboard with a seamlessly cast-on safety edge made from (PUR) polyurethane.

Features of top. Fixed horizontal working surface.

Accessories and options. Glides for hard and soft floors and briefcase (satchel) hooks. Plywood or grid bookshelf or chair suspension for all VS school chairs (PantoSwing up to size 4).

Important notice. The table height can vary slightly depending on the glides. PUR edges are extremely robust, but can show signs of discoloration over time.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of chipboard with PUR edge: L2.

## Classic Skid-table.

Frame of solid beechwood with middle legs on flat tapering skids.

Table sizes in 5 fixed heights in accordance with DIN EN 1729.

Table top of melamine-resin coated chipboard with seamless moulded-on (PUR) polyurethane safety edges. Alternatively with extremely wear-resistant LIGNOdur safety top with soft rounded edges.

Features and options. Glides for hard and soft floors. Satchel hook, grid and plywood bookshelf (2105, 2106, 2108-2110).

Depending on the type of top and castors, the table height can vary slightly.

**Important notice.** The table height can vary slightly depending on the type of table top and the glides. PUR edges are extremely robust, but can show signs of discoloration over time.

The following material groups are available to choose from: Frame made of wood: H(natural); Top made of LIGNOdur: L1; Top made of chipboard with PUR edge: L2.

## FlipTable-RU

### Standing and sitting table with round tube frame and folding top.

Construction of a centrally placed black tubular steel traverse with an articulated console. Folding release can be triggered with a two-hand safety operation under the table top. With a fitting to secure the top in horizontal and vertical position and optionally with a table connector.

**Table height** in maximum 3 fixed sitting heights or 2 standing heights according to DIN EN 1729 and in office height 74 cm. Optionally height-adjustable.

**Table top** made of melamine resin, laminate or veneer-coated chipboard or HPL solid core board. Chipboard with plastic or solid wood edges and partly with rounded PUR edges (see table). The corners are angular or optionally rounded.

**Frame** consisting of two bent, powder-coated or chrome-plated steel tubes. Frame with lockable castors.

**Function.** When the top is folded up, any number of tables can be pushed together to optimise space.

**Note.** PUR edges are extremely resistant, but may show colour changes over time.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; Top made of chipboard, HPL: L9; Top veneered: F1; Chipboard with laminate: L9.

## M-Table

### Cheek table in standing and sitting height.

Construction of two side-panel elements, a table top and a stable, centrally positioned double crosspiece, each made of laminate- or veneer-coated chipboard. Additional steel connecting fittings for increased stability. Both sides with glides. As a standing table, with two additional tubular steel footrests as standard.

Tables in one seat height and 3 standing heights according to DIN EN 1729 and in office seat height 74 cm.

Electrification optionally with metal cable outlet, built-in socket or a module for wireless charging of smartphones. In the centre of the table in a maximum of 3 possible positions.

**Installation:** Free-standing or wall-mounted or in combination with the M-Panel as a meeting point. For use in rooms with high safety requirements, also with floor mounting.

The following material groups are available to choose from: Chipboard with laminate: L4; Top veneered: F1.

## InteractiveTeach Media teacher's workstation with storage space.

Workstation consisting of a side substructure, a rear substructure and a table top with a generously dimensioned cable flap. Carcass, cheek and table top made of melamine-resin-coated chipboard with glued-on plastic edge.

Side substructure (left or right) consisting of a carcass with material pull-out and CPU storage space behind a lockable swing door. Fitted on the side with a sliding panel for free access to the CPU cabling. A sliding table-top segments permits access from above to further storage space (e.g. for a document camera).

Rear substructure with a lockable swing door consisting of a cable compartment for spare cable and hardware peripherals. The compartment is accessible from above through the cable flap in the table top (see below). Further storage space at the bottom; fitted with an adjustable shelf insert and brackets for cable routing. Carcass with sheet-steel legs.

Table top comprising three segments. Sliding part on the side for access from above to the substructure. Cable flap at the rear (rear substructure) and worktop on the user side. Table top with a frame of half-oval steel tube.

Equipment. Optionally with monitor holder „Flo“.

The following material groups are available to choose from: Frame made of steel: M1; Body and front made of chipboard: L6; Cheek made of chipboard: L3.

## Media rail systems

**PRODUCT INFORMATION** FlexiPanel-1\_TY\_EN - 22.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## FlexiPanel for wall or cabinet mounting Media rail with one board level.

Mounting on walls or Serie 800 special add-on cabinets. When wall-mounted, it is possible to compensate for slight wall unevenness of max. 13 mm.

System consisting of two aluminium profiles positioned above one another, equipped as standard with a hook strip and optionally with an integrated picture clamping strip. Lightweight boards can easily be inserted in and removed from the one-part profiled rail. As an option, a wall-mounted, writable base surface made from enamel steel can be inserted at the back (level 0). The end of the profile is closed with a tight-fitting plastic cap.

Boards can be used on both sides and are equipped with a fabric lining that is suitable for pins, an enamel steel surface with different rulings or a laminate coating. The wood-fibre board is equipped all-round with a moulded, shock-resistant polyurethane edge.

The following material groups are available to choose from: Writing surface made of steel: E1; Pinboard made of fabric: S72; Chipboard with writable laminate: L(white).

## MediaPro-II-Basic Rail.

MediaPro-II-Basic, wall-mounted media rail.

System comprising a multifunctional aluminum rail system with an integrated picture rail and a profile section for level 1 slot-in accessories and boards.

Function. VS level 1 accessories and the picture rail (see table) can be slid over each other.

Mounting. Wall-mounted with visible screw fastenings. Longer wall rail systems are combined from several 3-meter elements and if necessary a cut element. Connection is effected linearly with a concealed adapter or with a 90° corner connector for angle joints. Comes with plastic end caps as standard. Additionally, the wall protection rail should be used to prevent the system from getting dirty in the area of the lower rollers.

Accessories. 90° corner connector, wall protection rail, plastic picture hooks, boards (also height-adjustable), flip-charts, roll-charts, projection boards and aluminum suspension hooks with integrated anti-theft protection.

The following material groups are available to choose from: Rail made of aluminium: M(anodisé).

	Max. load: 100 kg/lin.m Fastening possibility: every 40 cm

## MediaPro-II-Comfort Rail.

MediaPro-II-Comfort, wall-mounted media rail.

System comprising a multifunctional aluminum rail system with an integrated picture rail, a magnetically adherent decorative band and a profile section for level 1 slot-in accessories and boards.

Function. VS level 1 accessories, the picture rail and the magnetically adherent strip (see table) can be slid over each other.

Mounting. Wall-mounted with concealed screw fastenings. Longer wall rail systems are combined from several 3-meter elements and if necessary a cut element. Connection is effected linearly with a concealed adapter or with a 90° corner connector for angle joints. Comes with plastic end caps as standard. Additionally, the wall protection rail should be used to prevent the system from getting dirty in the area of the lower rollers.

Accessories. 90° corner connector, wall protection rail, plastic picture hooks, magnets, stoppers, boards (also height-adjustable), flip-charts, roll-charts, projection boards and aluminum suspension hooks with integrated anti-theft protection. The following material groups are available to choose from: Rail made of aluminium: M(anodisé).

## MediaPro-II-Premium Rail.

MediaPro-II-Premium, wall-mounted media rail.

System comprising a multifunctional aluminum rail system with an integrated picture rail, a magnetically adherent decorative band and profile sections for level 1 and level 2 slot-in accessories and boards. Additionally with an enamel steel baseplate as level 0.

Function. VS level 1 and 2 accessories, the picture rail and the magnetically adherent strip (see table) can be slid over each other.

Mounting. Wall-mounted with concealed screw fastenings. Longer wall rail systems are combined from several 3-meter elements and if necessary a cut element. Connection is effected linearly with a concealed adapter or with a 90° corner connector for angle joints. Comes with plastic end caps as standard. Additionally, the wall protection rail should be used to prevent the system from getting dirty in the area of the lower rollers.

Accessories. 90° corner connector, wall protection rail, plastic picture hooks, magnets, stoppers, boards (also height-adjustable), flip-charts, roll-charts, projection boards and aluminum suspension hooks with integrated anti-theft protection. The following material groups are available to choose from: Rail made of aluminium: M(anodisé).

## MediaPro-II Board.

**System.** Boards for slotting into the MediaPro-II rail systems. Can optionally be used on two sides or one side. The elements can be easily slid.

**Function.** Level 1 boards can be slid over elements of the picture rail and the magnetically adherent strip. Level 2 boards can also be slid over level 1 slot-in elements.

**Board areas.** Sturdy, lightweight design with anodized aluminum edging and rounded safety corners. Aluminum safety hanging fittings with integrated plastic glide elements or aluminum roller glide elements and unhinging retainer at the top. Aluminum-colored plastic spacer wheels at the bottom.

**Board surfaces.** Enamel steel (with and without lines) for chalk or VS boardmarker, cork linoleum, natural cork and felt covering (suitable for pins) are available. Different materials can be used on the front and back of all boards.

**Accessories.** Magnetically adherent pen holder and sponge holder.

**Note.** The models can only be used in each case within one system, i.e. MediaPro-Basic or Comfort or Premium, and one level.

The following material groups are available to choose from: Writing surface made of steel: E1; Pinboard made of cork: K(natural cork); Pinboard made of fabric: S54; Projection surface: E(matt white).

## MediaPro-II Flipchart, rollchart.

**System.** Charts for slotting into the MediaPro-II rail systems. The elements can be easily slid.

**Function.** Level 1 boards can be slid over elements of the picture rail and the magnetically adherent strip. Level 2 boards can also be slid over level 1 slot-in elements.

**Board areas.** Sturdy, lightweight design with anodized aluminum edging and rounded safety corners. Aluminum safety hanging fittings with integrated rollers and unhinging retainer at the top. Aluminum-colored plastic spacer wheels at the bottom.

**Board surfaces** in white enamel steel (without lines) for VS boardmarker and with paper holders for flip- and roll-charts including pad or roll of paper.

**Note.** The model can only be used in each case within one system, i.e. MediaPro-Basic or Comfort or Premium, and the corresponding level.

The following material groups are available to choose from: Writing surface made of steel: E(white).

Flipchart Rollchart	Basic	Level 1	07825	07826		07827	07828

## MediaPro-II Projection board (tilting).

**System.** Projection boards for slotting into the MediaPro-II rail systems. The elements can be easily slid.

**Function.** Level 1 boards can be slid over elements of the picture rail and the magnetically adherent strip. Level 2 boards can also be slid over level 1 slot-in elements.

**Projection areas.** Sturdy, lightweight design with anodized aluminum edging and rounded safety corners. Aluminum safety hanging fittings with integrated rollers and unhinging retainer at the top. Aluminum-colored plastic spacer wheels at the bottom.

**Board surfaces** in coated matt white for slide, film, daylight, LCD and video projections. Board function. Tilting.

**Note.** The model can only be used in each case within one system, i.e. MediaPro-Basic or Comfort or Premium, and the corresponding level.

The following material groups are available to choose from: Projection surface: E(matt white).

## TopPilon-Tridacta

### Pylon board with two writing and one projection surface.

Two pairs of pylons (pair of uprights) made from extruded aluminium profiles with natural anodized finish. Counterweights made from steel or plastic, lightweight, low-noise and maintenance-free, travelling in the uprights. The board surface can be moved vertically and horizontally in front of the pylons. See table for maximum pylon height.

**Installation.** Wall mounting.

**Board surfaces** made from steel sheet, held in frame without screws, with rounded aluminium profiles and safety corners. Wiper holder and chalk strip on the board surfaces (F1, F2) made from aluminium with natural anodized finish and with side safety caps.

Centre, wall-mounted projection surface. Surface can be tilted to any position, held in frame without screws, with rounded aluminium profiles and safety corners.

The following material groups are available to choose from: Pylon made of aluminium: M(anodisé); Writing surface made of steel: E1; Projection surface: E(matt white).

## Upholstery elements

**PRODUCT INFORMATION** Shift-p-LSitz\_TY\_EN - 22.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Shift+ Landscape Soft seating elements.

Upholstered-element system consisting of carcass and seating elements.

Seating elements are linear or curved stools. Individual elements can be combined to form complete landscapes. Elements consisting of a floor plate with plastic or felt glide elements and a cushion of foam with leatherette cover.

Seating sizes in 3 fixed heights in accordance with DIN EN 1729.

Carcass of melamine-resin-coated chipboards with glued-on plastic edge. With glued centre wall for partitioning the carcass. With rows of holes (25 mm) for adjustable shelf inserts and a perforated-plate back panel.

Function: Curved Landscape seating and cabinet elements can be combined linearly and, thanks to the matched inner and outer radii, back to back to create circular and serpentine seating/cabinet landscapes.

Fire protection of the upholstery elements optionally according to DIN 66084 corresponding to classes P-c (low), P-b (medium), P-a (high).

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1; Fabric cover: S40,64,81.

Size as per DIN EN 1729 h = 30 ● 2 h = 38 ● 4 h = 46 ● 6

## EcoTable-R

### Rectangular table with round tubular legs.

Frame consisting of an all-round rectangular steel edging with welded-on table legs made from round tubular steel, powder-coated with coloured epoxy resin. Table with levelling screws, glide elements for hard or soft floorings or universal glide elements, or with 2 or 4 lockable castors.

Table height 74 cm and 8 other heights.

Table top made from 19-mm or 25-mm melamine resin-coated, laminate-coated or veneered chipboard with glued plastic or solid wood edge or from rigid 13-mm HPL top. All models available with angled or curved (radius = 25 mm) corners.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; HPL-top: L4; Chipboard with laminate: L9; Top veneered: F1.

Further products on this page: JUMPER Ply Four.

## Cross-Q

### Individual table with square tubular legs.

Frame consisting of a welded, set-back rectangular steel edging, powder-coated with black epoxy resin and screwed-on bracket with table legs made from square tubular steel, powder-coated with coloured epoxy resin or chrome-plated. Table with levelling screws, glide elements for hard or soft floorings or universal glide elements, or with 2 or 4 lockable castors. Table height 74 cm and 8 other heights.

Table top made from 19-mm melamine resin-coated or veneered chipboard with glued plastic or solid wood edge or from highly rigid 13-mm HPL solid board. Equipped with angled corners in all cases.

Optionally with an E-box or a built-in socket from 90 cm wide tables for electrification in the centre of the table.

The following material groups are available to choose from: Frame made of steel: M1,(chrome-plated); Top made of chipboard: L6; HPL-top: L4; Top veneered: F1.

## LiteTable-AL Stackable lightweight table.

**Frame.** The leg elements of round aluminium tube are pressed onto and screwed to the rectangular aluminium tube top frame using high-strength corner connectors. The legs and top frame are powder-coated. Tables can be stacked thanks to the inner and outer legs arranged in pairs. However, depending on how they are turned, they can be arranged in rows without gaps. The top frame is equipped with stacking and gliding protection. Tables have glide elements for hard or soft floors or 2C universal glide elements and optionally 2 castors on the outer legs.

Table sizes in 9 fixed heights in accordance with DIN EN 1729.

**Table top** with a chipboard top and glued-on plastic plastic edge. Edged or rounded corners.

**Function.** Because the materials used are extremely lightweight and yet robust, the table can be stacked by a single person. Optionally, depending on the setup, table connectors (Model 21003) can be used.

**Warning:** A maximum of 4 stacked (unloaded) tables may be moved on their castors. The trapezoidal combinations shown in the table cannot be realised.

The following material groups are available to choose from: Frame made of aluminum: M1; Top made of chipboard: L4. Further products on this page: Compass-LuPo.

	These combinations cannot be realised.	* w-d footprint

## LiteTable-ST Stackable table.

Frame made from welded round tubular steel legs with all-round rectangular tubular steel top frame, all powder-coated. Because the inner and outer legs are arranged in pairs, the table is stackable. What is more, they can be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Tables with glide elements for hard or soft floorings or with 2C universal glide elements and, optionally, with two castors at the outer legs.

Table sizes in 9 fixed heights in accordance with DIN EN 1729.

Table top Consisting of a HPL or chipboard top and glued plastic border. Available with edged or rounded corners as required.

Optionally it is also possible to use table connectors depending on the table arrangement (model 21003).

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L4; HPL-top: L4; Chipboard with laminate: L9.

Further products on this page: Compass-Soft.

## Clapp-4Q

### Folding table with square tubular legs.

Frame consisting of two rectangular tubular steel edgings along the long side, screwed rigidly to the table top. The two U-shaped leg brackets made from square tubular steel are activated by means of a folding mechanism with safety bracket and then locked in place when open or closed. The leg brackets are chrome-plated or coloured and edgings are black powder-coated with epoxy resin. The table legs have levelling screws, glide elements for hard or soft floorings.

Table height 74 cm.

Table top made from 19-mm melamine resin-coated chipboard with glued plastic edge or from highly rigid 13-mm HPL solid board. Equipped with angled corners in all cases.

Equipped with stack protection to prevent scratches and damage to surfaces. A stacking cart can be used to transport the folded tables.

The following material groups are available to choose from: Frame made of steel: M1,(chrome-plated); Top made of chipboard: L4; HPL-top: L4.

## JUMPER StudioTable Stackable four-legged table.

Frame consisting of welded legs with all-round edging made from powder-coated or chromium-plated precision rectangular steel tubing. Due to the asymmetrically positioned table top, the tables are stackable but can nevertheless be rotated to form continuous rows. The edge of the top frame is equipped with stacking and glide protection. Table with glide elements for hard or soft floorings or with 2C universal glide elements.

Table height 74 cm.

Table top With a 19-mm melamine-coated or laminate-coated chipboard top and glued plastic edge or a 13-mm HPL top.

**Function.** The table can be stacked by a single person due to the lightweight but tough materials. See table for maximum stacking capacity.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; HPL-top: L4; Chipboard with laminate: L9.

## Clapp-T Folding table.

Frame consisting of two T-shaped foot supports made from round and two cross-frames made from rectangular steel tubing. All items powder-coated or chrome-plated. Skids with plastic kick protection and adjustable glide elements with plastic or felt. With folding mechanism and integrated stack protection.

Table height 74 cm.

Table top made from melamine-coated chipboard (19mm) with glued plastic edge or solid HPL top, each with straight corners.

Accessories: Stacking cart for transporting maximum 10 folding tables. Made from powder-coated rectangular tubular steel. The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard: L4; HPL-top: L4.

## FlipTable-RU

### Standing and sitting table with round tube frame and folding top.

Construction of a centrally placed black tubular steel crossbar with an articulated console. Folding release can be triggered with a two-hand safety operation under the table top. With a fitting to secure the top in horizontal and vertical position and optionally with a table connector.

Table height in 1 fixed sitting, 1 standing and 4 other heights.

Table top made of melamine resin, laminate or veneer-coated chipboard or HPL solid core board. Chipboard with plastic or solid wood edges. The corners are angular or optionally rounded.

Frame consisting of two bent, powder-coated or chrome-plated steel tubes. Frame with lockable castors.

Function. Optionally with central E-box or built-in socket. When the top is folded up, any number of tables can be pushed together to optimise space.

The following material groups are available to choose from: Frame made of steel: M1; Top made of chipboard: L6; Top made of chipboard, HPL: L9; Top veneered: F1; Chipboard with laminate: L9.

## RondoLift-ST

### Height-adjustable sit-at and stand-at table.

Frame comprising a central post/leg made from chrome-plated steel tube and a disc-shaped base with stainless steel cover and with plastic and felt glide elements. RondoLift-Leg/post with integrated gas-filled strut and hand switch on the table-top edge. The hand switch is fitted with a safety cover to protect against unintentional deployment of the gas-filled strut. The RondoSit and RondoStand models are also optionally available with a chrome-plated centre post/leg.

Table height of 72 or 74 cm, or 103 and 110 cm as stand-at table and continuously adjustable from 69–113 cm (see table). Table top of chipboard laminated with either melamine-resin, veneer or linoleum and with glued-on plastic or beech edges. Also with high-strength HPL solid core plate.

Table top shapes are circular and square.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard: L6; Top made of linoleum: L8; Top veneered: F1; HPL-top: L4.

## RondoLift-KF

### Height-adjustable sit-at and stand-at table.

Frame comprising a round central leg/post and a four- or five-foot star-shaped base made from rectangular section, all powder-coated. Leg/post with integrated gas-filled strut and hand switch on the table-top edge. The hand switch is fitted with a safety cover to protect against unintentional deployment of the gas-filled strut. Star-shaped base with lockable castors or with glide elements.

Table height infinitely variable.

Table top of melamine resin, linoleum or veneer coated chipboard with glued-on plastic or wooden edges. Also with high-strength HPL solid core plate. Round or square tables (from 90 cm) optionally with a folding and sliding table top for safe transport.

Features. Oval table can be supplied with an optional lockable drawer and/or screen (see table) under the top.

Table top shapes are oval, circular and square.

The following material groups are available to choose from: Frame made of steel tube: M1; Top made of chipboard: L6; Top made of linoleum: L8; Top veneered: F1; HPL-top: L4.

## M-Table

### Cheek table in standing and sitting height.

Construction of two side-panel elements, a tabletop and a stable, centrally positioned double crosspiece, each made of laminate- or veneer-coated chipboard. Additional steel connecting fittings for increased stability. Both sides with glides. As a standing table, with two additional tubular steel footrests as standard.

Table height in 74 cm for sitting, in 106 cm for high sitting or 120 cm as standing table.

Electrification optional with metal cable outlet, built-in socket or a module for wireless charging of smartphones. In the centre of the table in a maximum of 3 possible positions.

**Installation.** Free-standing or wall-mounted or in combination with the M-Panel as a meeting point. For use in corridors or assembly halls, or in rooms with high security requirements, also with floor mounting.

The following material groups are available to choose from: Chipboard with laminate: L4; Top veneered: F1.

## M-Panel

### Meeting point with display holder.

### Free-standing, wall-mounted or integrated with M-Table.

Wall panel as an information or meeting point to accommodate a display, sound bar or video sound bar. Panel with internal cabling. Optionally with a 2-fold Schuko socket and 2x USB or with a 2-fold Schuko socket and 1x HDMI, 1x Mini-Displayport and 2x CAT 6.

Construction consisting of a black powder-coated steel frame with internal electrification. If wall-mounted, with a single-sided otherwise with double-sided panelling consisting of melamine or veneer-coated chipboard.

Free-standing or wall-mounted installation or in combination with the M-Table in sitting and standing height. In the case of a free-standing Installation: foot stabilisers provide stability. In traffic zones, floor mounting is recommended.

## NetWork Add-on table.

Constructed of four-sided, half-oval shaped top frame and round legs, both of powder-coated or chrome-plated steel tube. Functional gap between table top and supporting frame accepts accessories and adapters for the linking of further tables and tops.

Electrification is available through a grid cable basket which is hinged on both sides or clip-on plastic modules. The cable outlets are holes with plastic or aluminium inserts.

Table heights are fixed or adjustable in either steps or continuously with a winding handle. Legs fitted with levelling screws or castors.

Table top is a melamine-resin laminated, veneered or linoleum covered chipboard with glued-on plastic or beech edges. Choice of square or round corners. The angled top insert of leather-covered steel sheet can be positioned in the corner and allows a greater table depth and thus optimum spacing from the monitor.

The following material groups are available to choose from: Frame made of steel tube: M1,(chrome-plated); Top made of chipboard: L6; Top made of linoleum: L8; Top veneered: F1.

## NetWork CPU accessories and stand-at desk.

CPU-holder for attachment of the CPU to the table side.

L-shaped grid of powder-coated steel rod. The holder is inserted into the functional gap between table top and frame. Further shelves can be hung onto it. The CPU is secured with a strap and quick-release fastener.

Hanging shelves are of melamine-resin laminated chipboard with glued-on plastic edges and rounded corners. Fitted with a bracket of arctic-colored powder-coated steel rod for hanging onto the CPU-holder and CPU-grid, for the upper and lower positions.

Stand-at desk for insertion into the functional gap between table top and frame. With a swivelable post of powder-coated steel tube as well as a working surface of melamine-resin laminated chipboard.

The following material groups are available to choose from: Frame made of steel tube: M(arctic); Top made of chipboard: L(black).

## Pareto-C

### Height-adjustable, transport-optimized desk with C-type foot.

Design in accordance with DIN EN 527-1 consisting of two asymmetrically positioned tubular steel cross-pieces and welded brackets.

Substructure consisting of two C-type feet made from powder-coated metal with round, square or rectangular uprights and skids with angular ends. Electrically-driven height-adjustment with one- or two-stage telescoping uprights, optionally with display, memory, collision protection and child safety protection. Table legs can be folded for ease of transport.

Table top made from melamine-resin, veneer or linoleum-coated chipboard with edged corners.

Electrical connections (optional) by means of a folding metal cable tray with round cable chain.

Cable outlet through a maximum of three metal outlets (left, centre, right) or a cable flap positioned on the left or right.

Accessories for electrical connection (Schuko power socket) and CPU holder with retaining strap.

The following material groups are available to choose from: Frame made of steel tube: M2; Top made of chipboard: L6; Top made of linoleum: L8; Top veneered: F1.

## Serie 2000 (partition walls)

**PRODUCT INFORMATION** S2000-P-23\_TY\_EN - 30.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 2000 Typ P. Folding screen (2/3 parts).

System consists of 2 or 3 flexibly-jointed, mobile, free-standing screen.

Construction is based on a four-sided frame of aluminium profile and a filling element. Add-on elements are connected by a flexible joint and can be easily folded together.

**Filling elements:** 1. Melamine-resin laminated chipboard. 2. chipboard laminated with a vitreous-enamelled metal sheet to which magnets adhere (at level 155 cm). 3. From a lightweight top with fabric covering. 4. A melamine-resin laminated sound-absorbing panel with slits. 5. A translucent double-ribbed board.

**Supporting element** consists of short struts each with 2 castors and a supporting castor. For safety reasons paravent screens in kindergartens and schools must be fitted with a push-handle.

The following material groups are available to choose from: Frame made of aluminum: M(anodisé); Stabiliser and foot made of aluminum: M(arctic, black RAL 9011); Writing surface made of steel: E(white); Fabric cover: S46,52,73,74,78,79,80; Acoustic front made of chipboard: L10; Front made of chipboard: L6.

## SpaceWalk-G

### Mobile storage module with a guide system for Gragnells boxes.

Frame consisting of bent and welded rectangular steel tube on 4 lockable double swivel casters (d=65mm) and a top sheet metal shelf. Optionally with a rear panel, two side panels and a hinged door made of sheet steel in different combinations. Side parts with a recess as a handle. All steel parts powder coated in color.

Modular system consisting of 1, 2 and 3 part elements.

Rail system between the frames with metal guides and pull-out stop. In the metal guides different sized Gragnells boxes with or without lid can be variably inserted in the module as required. Optionally without back panel, modules can also be used on both sides.

Locking system optionally with cylinder lock.

The following material groups are available to choose from: Frame made of metal: M1; Gragnells plastic box: C3.

* Max. load per box: 5 kg.

## Shift+ Landscape Mobile shelf units.

Constructed from glued linear and curved (60°) body on steel crosspiece with 4 or 5 (60°) tech castors, 2 of them lockable. Optionally with 4 or 5 adjustable feet.

Body made from melamine resin-coated chipboard with glued (KU) plastic edge. With glued central panels to subdivide the body. With rows of drill holes (25 mm) for shelf inserts and perforated sheet visible back panel. With back panel and storage space on both sides depending on model.

Function (options): With shelf inserts or wardrobe hooks (4-way or 8-way) and magnets on the outside surfaces for docking-on further cabinet elements. Curved Landscape seat, table and cabinet elements can be combined in rows or as circular and undulating seating/cabinet landscapes thanks to the harmonized internal and external radii.

Sliding handles (optional) made from steel on the top of the body.

The following material groups are available to choose from: Body made of chipboard: L4; Perforated-plate: M1.

## Serie 800-Mobil (mobile storage space)

**PRODUCT INFORMATION** S8Mobil-FTuer\_TY\_EN - 22.11.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800-Mobil Mobile swing-door cabinets.

Mobile element cabinet (see table for details) in 2, 3, 4 and 5 height units and 3 fixed depths. The cabinets are suitable for a maximum additional load of 75 kg/sqm and some of them are equipped with counterweights to provide the necessary stability. Lockable 75-mm design castors ensure safe mobility.

**Type:** Swing-door cabinet, some with central panel (CPsb) flush with the body or set-back for the horizontal subdivision of the body. With visible back panel fixed in groove.

**Front** consisting of 2 separately closing single swing doors or a double swing door (CPsb) with bow handles, inset handles or lever handles.

**Locking system** with cylinder or turn knob locks as standard.

**Internal equipment** consisting of shelf inserts.

The following material groups are available to choose from: Body and bases made of chipboard: L6; Front made of chipboard: L3; Front veneered: F1.

## Serie 800 (cabinet walls)

**TECHNICAL DESCRIPTION** S800-Vor1\_TB\_EN - 05.01.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – grid system.

Series 800 element cabinets are made from melamine-resin-coated chipboard with glue-on plastic or beech edge. Cabinets are available in 6 widths, 6 heights and 2 depths. One height grid (1FH) corresponds to 375 mm. Add-on cabinets are available 1, 2 and 3FH without [1] and with [2] base for a ladder rail to be installed (cf. table). In addition, many models (without technical built-in components) can be variably shortened in the width, height and depth dimensions in five-millimetre increments and thus built for a perfect fit in all room situations.

Top shelves are placed on the side walls and thereby form a cleanly structured top cover for low cabinets.

Cabinet fronts (2 cm) and further protruding parts such as handles for example are not taken into consideration in the depth specifications.

**Erection:** Models from a height of 197 cm or models with drawers and/or pullouts (DGV Regel 108-007) must be secured to the wall or floor.

The following material groups are available to choose from: Front made of chipboard: L3; Body and bases made of chipboard: L3; Front veneered: F1.

Serie 800		File height (37,5)	1FH	2FH	3FH	4FH	5FH	6FH
Cabinet		h without base		77,0	114,5	152,0	189,5	227,0
		h with base 7,5 cm		84,5	122,0	159,5	197,0	234,5
		h with base 4,0 cm		81,0	118,5	156,0	193,5	231,0
Add-on cabinet		h without base	37,5	75,0	112,5			
		h with base 7,5 cm (ladder rail)	45,0	82,5	120,0			

**TECHNICAL DESCRIPTION** S800-Vor2\_TB\_EN - 23.02.2022 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – carcass construction.

Series 800 element cabinets are supplied fully glued or disassembled, with eccentric connectors. The row of holes (dia. 3 mm) at a grid distance of 25 mm can be used right through.

Shelf carriers (load class L75) are screwed into standard-equipped cabinets [1] and screwed and inserted into individually equipped cabinets [2].

Adjustable shelf inserts [3] made from chipboard (up to a width of 80 cm), coreboard (width 40 - 120 cm) and sheet steel (width 80 - 120 cm) have a concealed mounting for the shelf carriers.

Vertical carcass structures are fashioned by glued and, in the case of disassembled cabinets, by construction shelves [4] with eccentric connectors.

Horizontal carcass structures are fashioned by middle partitions flush with the carcass [5] or set back [6]. These are glued or, in the case of disassembled cabinets, equipped with eccentric connectors. Middle partitions flush with the carcass permit the use of separately closing single swing doors. Set-back partitions are combined with double swing doors.

Bases are a structural component of the carcass construction made from chipboard [7] or are positioned as a steel base [8] at heights of 75 and 40 mm below the carcass. Both base types have precision height adjustment by means of an Allen key [9] through the bottom shelf. The chipboard base can be fitted with a base cover strip flush with the front/door [10]. Base recesses [11] on the back are possible in the case of floor strips.

Wardrobe and washbasin cabinets are provided with plastic ventilation outlets on the top and bottom edges of the door.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

**TECHNICAL DESCRIPTION** S800-Vor3\_TB\_EN - 04.03.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – swing doors.

Series 800 element cabinets can be fitted with two different door hinges for the opening angles 110° [1] or 270° [2]. 110° door hinges cannot be seen from the outside and have damped door closing. Both hinges are available for single and for double swing doors in accordance with the carcass structure.

Single swing doors [3] are available hung on either the left or the right. The hanging side can be freely defined for widths up to 60 cm.

Double swing doors [4] are fitted with a flexible plastic impact strip.

Bow handles (steel, plastic and wood), knob handles und inset handles (round) are available to choose from.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGVV Regel 108-007) must be secured to the wall or floor.

**TECHNICAL DESCRIPTION** S800-Vor4\_TB\_EN - 04.03.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – closing of swing doors, sliding doors and roller shutters.

Series 800 element cabinets are available with swing doors (see Preliminary remark – swing doors) and with assorted sliding doors and roller shutters.

Lockable single and double swing doors [1] are equipped with cylinder or turning-knob locks and a locking rod with striker on the top and bottom shelves. [7] Bow handles (steel, plastic and wood), knob handles and inset handles (round) are available to choose from.

Glass sliding doors [2] (optionally lockable) made from single-layer safety glass are equipped with a roller guide and a rail system made from aluminium. A pressure-cylinder lock locks the door.

Chipboard sliding doors [3] (optionally lockable) are locked by a pressure-cylinder lock. [7] Bow handles (steel, plastic and wood), knob handles and inset handles (round and rectangular) are available to choose from.

Vertical roller shutters [4] (optionally lockable) made from plastic are fitted on 5FH cabinets with a horizontal strip handle [5] over the entire cabinet width. All cabinets are equipped with a strip handle with catch. A roller-shutter lock locks the roller shutter.

The keys will fold [6] and are supplied with a spare key located in the plastic lid in the case of customer-defined locking or locking based on a locking plan.

Erection: Models from a height of 197 cm or models with drawers and/or pullouts (DGVV Regel 108-007) must be secured to the wall or floor.

**TECHNICAL DESCRIPTION** S800-Vor5\_TB\_EN - 04.03.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – closing of drawers and lockers.

Series 800 element cabinets are available with swing doors (see Preliminary remark – swing doors) and with assorted drawers and lockers.

**Drawer cabinets [1]** (optionally lockable) are available with 1 or 2 rows of drawers which are equipped in each case with central rod locking and a lock in the top drawer. [5] Bow handles (steel, plastic and wood), knob handles and inset handles (round) are available to choose from.

**Locker cabinets [2]** (always lockable) are available with simple case locks or with combination locks. All without handles.

**Suspension filing cabinets and wide drawers [3]** (optionally lockable) are available with central rod locking and a lock in the top drawer. Pulling out several drawers at once is disabled.

Keys are folding [4] and are supplied on delivery with a spare key integrated in the plastic cap.

**Erection:** Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

**TECHNICAL DESCRIPTION** S800-Vor6\_TB\_EN - 04.03.2021 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Preliminary remark – wardrobe.

Series 800 element cabinets with swing doors can be equipped from 4FH as wardrobe cabinets. 3 different wardrobe systems are used, depending on the width and depth dimensions.

[1] Width less than 50 cm, depth = 42.5 cm: Centrally positioned 3-point hook under the hat shelf (max. load 35 kg).

[2] Width from 50 cm, depth = 42.5 cm: Pull-out wardrobe rod under the hat shelf (max. load 6 kg).

[3] Width from 40 cm, depth = 58.0 cm: Laterally positioned wardrobe bar under the hat shelf (max. load 50 kg).

Wardrobe cabinets are equipped with plastic ventilation outlets [4] on the top and bottom edges of the door. Hat shelves [5] are located in 4FH-high cabinets at position 3FH and in 5FH- and 6FH-high cabinets at position 4FH. 6FH cabinets also have an additional adjustable shelf insert.

**Erection:** Models from a height of 197 cm or models with drawers and/or pullouts (DGUV Regel 108-007) must be secured to the wall or floor.

**TECHNICAL DESCRIPTION** S800-Vor7\_TB\_EN - 06.04.2022 - [www.vs-furniture.com](http://www.vs-furniture.com)

## Serie 800

### Certified as belonging to sound absorption class C.

The swing doors and roller shutters of Series 800 units can be acoustically enhanced in order to improve sound absorption in rooms in which noise reverberates. This is achieved by using perforated surfaces for the swing doors and roller shutters. **Swing doors** certified as belonging to sound absorption class C: The sound absorption properties of Series 800 cabinets equipped with perforated swing doors in a reverberation chamber were determined in independent measurements performed according to DIN EN ISO 354. In addition, the determined sound absorption level was rated as being of sound absorption class C in accordance with DIN EN ISO 11654. Other measured characteristic values: Noise Reduction Coefficient  $NRC=0.65$ ; Sound Absorption Average  $SAA=0.64$  (according to ASTM C 423-09).

**Roller shutters** certified as belonging to sound absorption class C: The sound absorption properties of Series 800 cabinets equipped with perforated roller shutters in a reverberation chamber were determined in independent measurements performed according to DIN EN ISO 354. In addition, the determined sound absorption level was rated as being of sound absorption class C in accordance with DIN EN ISO 11654. Other measured characteristic values: Noise Reduction Coefficient  $NRC=0.60$ ; Sound Absorption Average  $SAA=0.65$  (according to ASTM C 423-09).

Standard surfaces are not eligible for classification (NOC).
